Pavement Surface Evaluation and Rating (PASER)

The PASER manual provides a uniform assessment methodology to evaluation of pavement surface condition. Surface conditions are a useful indicator to the health of the roadway section. The PASER ratings, combined with other factors, are helpful in planning maintenance priorities.

In addition to indicating the surface condition of a road, a given rating also includes a recommendation for needed maintenance or repair. This feature of the rating system facilitates its use and enhances its value as a tool in ongoing road maintenance.

RATINGS ARE RELATED TO NEEDED MAINTENANCE OR REPAIR	
Rating 9 & 10	No maintenance required
Rating 8	Little or no maintenance
Rating 7	Routine maintenance, cracksealing and minor patching
Rating 5 & 6	Preservative treatments (sealcoating)
Rating 3 & 4	Structural improvement and leveling (overlay or recycling)
Rating 1 & 2	Reconstruction
