\*Not all lands shown are accessible to the public

The Priority Conservation Areas Map illustrates geographically moderate, high and significant conservation value lands in shades of lighter to darker blue. When a landowner contacts the Town with a conservation interest, or when a conservation subdivision design is being proposed, this map will serve as an additional tool for consideration by Town planning staff, landowners, and other partnering entities.

**This map does not direct the Town to take any proactive action on any of these lands.**

The consultation of this map and its background conservation criteria is only utilized when there is an expressed landowner interest in pursuing a conservation action in partnership with the Town. This new tool will provide useful data and prioritization of limited resources when conservation opportunities become available.
