

WATERSHED BOUNDARIES

Legend

- Rare Plant Important Area (NYSDEC)
 - Onesquethaw-Coeymans Biodiversity Assessment Study Area
 - 100-Year Floodplain
 - 100-Foot Stream Buffer
 - Wetlands (NYSDEC and/or Federal)
 - Conservation/Parkland
 - Significant Natural Community (NYSDEC)
- an assemblage of interacting plant and animal populations that share a common environment; the particular assemblage of plant and animal species occurs across the landscape in areas with similar environmental conditions.*

2005 Land Cover*

- Tree Cover
- Scrub/Shrub

Steep Slopes

- 16%-25%
- 25%+

* Source: 2005 National Oceanic and Atmospheric Administration Land Cover Data (Target Accuracy is 85%)

FINAL

PURPOSE: The purpose of this map is to show the natural systems within the Town. These resources provide many benefits to our community including clean air, clean water and flood protection. They also serve as indicators as to the potential to provide habitats for plants and animal species.
