The 2025 Compost Facility season is April 1 - November 26

The Town of Bethlehem's Compost Facility is open to the public, and provides an ecologically responsible way of processing the yard waste and organics generated by Town residents into high quality compost and wood mulch products. Compost helps build healthy, beautiful landscapes and reduces greenhouse gas emissions/address climate change.

Yard waste: The facility accepts yard waste for drop-off (tipping fees apply to businesses and non-residents).

Food scraps are accepted from local haulers by appointment with advanced permission (tipping fees apply). We also now have a food scrap drop-spot program for registered residents. [See the website](#) for more details.

Compost Products: Screened Compost, Enhanced Screened Compost, Leaf Compost and Wood Mulch are available at the Compost Facility for residents, non-residents and commercial users. Read more about these products on the website or separate flyer. Rates can be found on the reverse of the print flyer or [on the Town website](#).

Dropping Yard Waste: Residents may drop off yard waste for FREE (up to 4 yards/week) during full service and self service days. Commercial users may only drop off yard waste during full service days, or self-service with season permit.
